

Your Powerful Intuition

Alan Sanson

You have Intuition
yes, you really do
Intuitive feeling
unique just to you

You know the answer
you know the Way
Let it flow, let it glow
Trust in yourself
Your feelings are right
for you here and right now

Study the theory, the millions of "hits"
if you so wish, though really not necessary
You may question your feelings
you may judge them so
Your brain loves haunting you
to get its foot in the door of doubt
with snippets of food-for-thought
To keep your intuition intact, in fact
write down your feelings with no logical thought
get them out
Feel, don't think
Go with your gut
It's as easy as that

Your Angels, your Guides
your Spirit, your Soul
your other Dimensions
your superconscious too
are there to suggest
you intuitively know what is best
Listen to their wisdom
they give you perspective
they know the way
Simply let them play

Listen with openness
Act with finesse

Have fun on your mission
